**Subject: Matching 2050 MTP Goals with Current TIP Highway Projects**

---

This memorandum documents the update of associated Metropolitan Transportation Plan (MTP) goals for the highway projects in the MPO's Transportation Improvement Program (TIP). In May, 2022, the MPO adopted its 2040 Metropolitan Transportation Plan, which identified six goals for the development of transportation system in the area. The linkage between the goals and TIP projects identifies how TIP projects contribute to the regional transportation goals in the MTP.

The six goals in the 2050 MTP are:

- **Goal #1: Safety** - A safe, secure transportation system for all users that reduces fatalities and severe injuries.
- **Goal #2: Mobility Choices** - An integrated and connected multimodal system that provides safe, convenient options for bicyclists, pedestrians, and transit users as well as motor vehicles.
- **Goal #3: System Reliability** - Improve the reliability of the movement of people and goods across the region in support of time-sensitive freight movement and logistics.
- **Goal #4: System Preservation** - Maintain and enhance existing transportation infrastructure assets in a good state of repair
- **Goal #5: Equity** - Provide healthy, convenient, and equitable transportation choices for those communities that are underserved or traditionally underrepresented.

- **Goal #6: Economic Vitality** - A transportation system that supports and enhances economic development goals and improves regional competitiveness in commerce.
- **Goal #7: Livability** - A transportation system and region that is attractive, sustainable, and contributes to regional well-being.

**Project Table** (as of June 2022)
